

SEBO AIRBELT K

MADE IN GERMANY

RELIABILITY AS STANDARD

COMPACT, LIGHTWEIGHT & POWERFUL

APPROVED BY
Arminster Carpets Ltd

MAKING LIGHT WORK OF HOUSEWORK™

Creative thinking has produced a vacuum cleaner which is light and compact, yet durable and powerful.

Innovation. Intelligent design shows in every aspect of the K models. Comfortable handle grips, lightweight telescopic tubes, the airbelt bumper system, the easy bag change, and many other details, together create a vacuum cleaner that works with you, and your home.

Performance. Powerful motors, professional cleaning heads and a highly efficient airflow combine to give outstanding cleaning performance on any type of floor and for any size of home.

Quality. Made in Germany, SEBO vacuum cleaners are constructed from the highest quality materials. Every SEBO vacuum cleaner is fully tested before it leaves the factory, so that you can be confident that in buying a SEBO, you are buying the best.

SEBO K range benefits:

- › 5 year guarantee
- › Light, compact and powerful
- › All round cleaning excellence
- › Comfortable and easy to use
- › Exceptionally quiet
- › Good Housekeeping Institute approved
- › British Allergy Foundation approved

Carpet manufacturers recommend SEBO....

... and not just for red carpets. Although many of the world's corridors of power are cleaned with a SEBO, using a SEBO vacuum cleaner will ensure the appearance and longevity of any carpet or flooring whether it's the White House, The Red Lion or 41, Magnolia Avenue!

SEBO K RANGE

SEBO airbelt K1

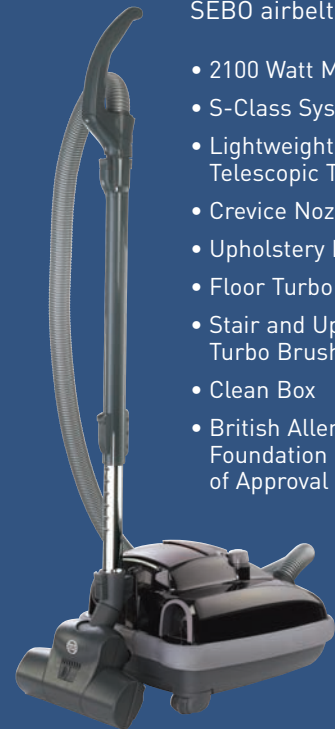

- 1800 Watt Motor
- Triple Microfilter System
- Lightweight Telescopic Tube
- Crevice Nozzle
- Upholstery Nozzle
- Combination Floor Head
- British Allergy Foundation Seal of Approval

SEBO airbelt K1 Komfort

- 2100 Watt Motor
- Triple Microfilter System
- Lightweight Telescopic Tube
- Crevice Nozzle
- Upholstery Nozzle
- Deluxe Parquet Brush
- Floor Turbo Brush
- British Allergy Foundation Seal of Approval

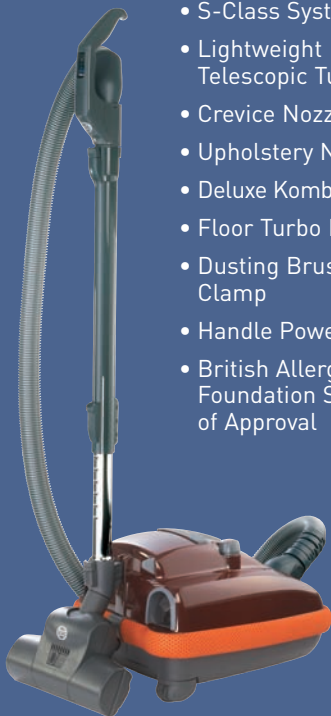

SEBO airbelt K1 Pet

- 2100 Watt Motor
- S-Class System
- Lightweight Telescopic Tube
- Crevice Nozzle
- Upholstery Nozzle
- Floor Turbo Brush
- Stair and Upholstery Turbo Brush
- Clean Box
- British Allergy Foundation Seal of Approval

SEBO airbelt K3 Vulcano

- 2100 Watt Motor
- S-Class System
- Lightweight Telescopic Tube
- Crevice Nozzle
- Upholstery Nozzle
- Deluxe Kombi Head
- Floor Turbo Brush
- Dusting Brush & Clamp
- Handle Power Control
- British Allergy Foundation Seal of Approval

SEBO airbelt K3 Premium

- 2100 Watt Motor
- S-Class System
- Lightweight Telescopic Tube
- Crevice Nozzle
- Upholstery Nozzle
- Deluxe Parquet Brush
- 150 Watt Electric Power Head
- Dusting Brush & Clamp
- Handle Power Control
- British Allergy Foundation Seal of Approval

VERSATILE VACUUMING

Made for you and your home

Floor Turbo Brush

Deluxe Parquet Brush

Electric Power Head

Carpet

The Combination Floor Head, Deluxe Kombi Head, Floor Turbo Brush and Electric Power Head are all suitable for carpet.

The rotating brushes of the Floor Turbo Brush and Electric Power Head groom the carpet, lifting the pile and giving superior hair and fibre removal.

They are also easier to push on carpeted areas. The brush action can be adjusted on the Electric Power Head – from soft for delicate carpets, to harder for more effective pile lifting.

Deluxe Kombi Head

Pet Hair

With powerful suction and rotating brush action, the K1 Komfort, K3 Premium and the K3 Vulcano are ideal for removing pet hair and other fibres. The K1 Pet is specifically designed for pet owners and comes with the Floor Turbo Brush, Stair & Upholstery Turbo Brush and also a SEBO Clean Box carpet cleaning kit.

The Floor Turbo Brush is lightweight, compact and very manoeuvrable. The Electric Power Head is for heavier duty situations and has cassette style brush removal and a self-closing trap door for easy maintenance.

Hard floor

All of the floor heads are suitable for hard flooring, but for ultimate hard floor cleaning performance SEBO have developed the Deluxe Parquet Brush and the Deluxe Kombi Head.

Deluxe Parquet Brush

The double-jointed neck gives superb manoeuvrability, and natural bristles combined with soft wheels make it ideal for even the most delicate surfaces. The brushes float up and down to adjust to surface undulations and are removable for easy cleaning or replacement.

Deluxe Kombi Head

Also featuring a double-jointed neck, the Deluxe Kombi Head is truly multi-purpose. With a natural bristle brush and soft wheels, it gives excellent cleaning results on hard flooring, yet it is also capable of high performance carpet cleaning and is the ideal choice for wool-loop type carpets. Like the Deluxe Parquet Brush the brush floats up and down to adjust to surface undulations and is removable for easy cleaning or replacement.

INTELLIGENT DESIGN

Performance
Quality
Reliability

Stairs

The K machines sit easily on stairs and are light enough to carry whilst you are cleaning.

The Stair and Upholstery Turbo Brush* is an air driven rotating brush for small areas. It lifts carpet pile, gives superior fibre/hair pick up and is very easy to use. It gives the ultimate cleaning performance on stairs and upholstery.

Upholstery

The Upholstery Nozzle fits to the end of the Crevice Nozzle to give extra reach. It makes upholstery cleaning more comfortable by reducing bending and is ideal for car cleaning.

Stair and Upholstery Turbo Brush

Protecting your home

We believe the SEBO airbelt gives the best possible protection to walls and furniture. The underlying high density foam absorbs impacts and the tough lycra-mix fabric cover prevents marking.

The K machines feature soft coated wheels, and the rear of the machine sits on soft 'feet' rather than hard plastic to prevent floor damage.

The chunky 'off-road' style castors are designed to allow the machine to glide easily over any surface.

Easy to handle

A comfortable handle grip (with integrated power control on the K3 Premium and K3 Vulcano) and three swivelling castors for manoeuvrability make the K machines easy to use, especially with the Floor Turbo Brush or Electric Power Head. The lightweight telescopic tube helps reduce weight on the arm.

* Standard with the K1 Pet

FILTRATION

No escape for dust

With SEBO, once dust has been picked up, you never have to face it again.

Clean Living

Clean indoor air is paramount for those who suffer from allergies, have pets, small children, or who just want a dust free home.

Anti-Allergy

K machines are fitted with three micro filters which give filtration of independently proven effectiveness. Models fitted with the Hospital Grade Filter achieve the ultra high S-Class* filtration level. The K range also features the patented SEBO airbelt Exhaust System (d). Acting as an exhaust diffuser, it prevents air blast which can cause allergens to become airborne.

British Allergy Foundation Seal of Approval

British Allergy Foundation tests found that the filtration system removes 100% of dust mite allergen and the SEBO bag system made emptying ultra hygienic.

Hospital Grade Filter (standard with the K1 Pet, K3 Premium and K3 Vulcano and can be fitted to the K1 and K1 Komfort)

The SEBO K machines feature a Triple Microfilter System:

The Ultra-Bag

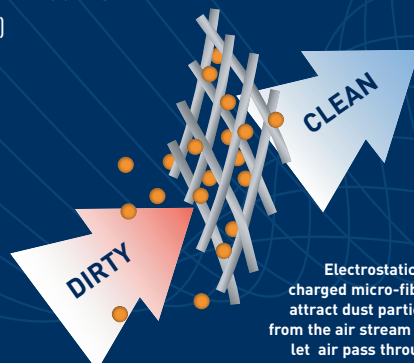

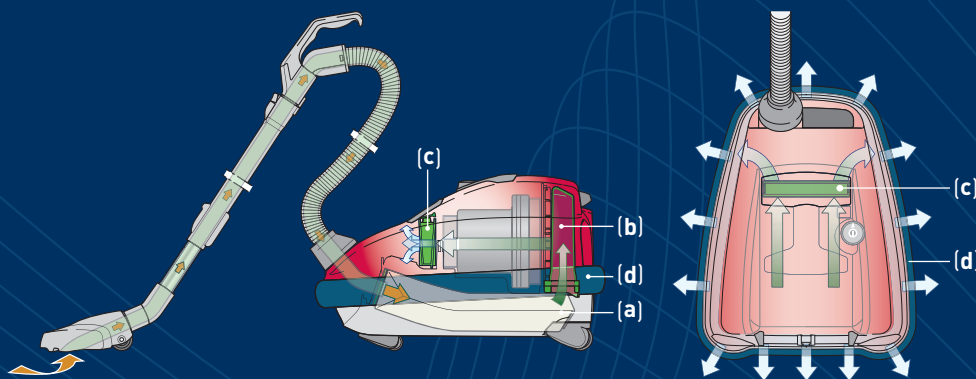

The first and most important Microfilter is the SEBO Ultra-Bag (a). Unlike traditional 'paper' bags the Ultra-Bag uses electrostatically charged micro-fibres which attract dust particles from the air stream and bond onto them (see diagram). Using this electrostatic principal enables a relatively open texture to the bag material – which lets air flow through easily, yet traps virtually all dust particles. Hence the Ultra-Bag gives excellent filtration and excellent suction. It will also hold more dirt than many bags which are bigger, 'on paper'. We believe a bag is the ideal way to remove collected dust from a vacuum cleaner.

Pre-motor Microfilter

An electrostatic Pre-motor Microfilter (b) protects the motor, as well as eliminating microscopic dust particles. On the K1 Pet, K3 Premium and the K3 Vulcano a higher specification filter is fitted which brings the overall filtration to the S-CLASS standard. This filter will also fit the K1 and K1 Komfort.

Exhaust Microfilter

The electrostatic Exhaust Microfilter (c) prevents the emission of carbon dust – which is generated by electric motors – ensuring that the air emitted by the vacuum cleaner is cleaner than the room air.

Electrostatically charged micro-fibres attract dust particles from the air stream and let air pass through.

* To achieve S-Class certification the filtration level of the vacuum cleaner has to be better than 99.97% at 0.3 micron

What our customers say

- “The best vacuum cleaner I have ever used. Brilliant! Makes life easier!”
- “Excellent cleaner. Wouldn't buy any other make”
- “You don't have to look at all the stuff you have sucked up, also come the time to empty, you don't have to breathe it in!”
- “Recommended by my physiotherapist”
- “A great product. Simple and easy to use”
- “Brilliant vacuum cleaner”
- “This is an excellent machine. A good looking, good performance vacuum cleaner! We think the best on the market!”
- “Delighted with the performance, compact design and high quality”
- “A pleasure to use”
- “Fantastic suction even though lower wattage than many other models and therefore more economical”
- “Simply the best vacuum I have ever used”
- “Far superior to my previous vacuums”
- “Very efficient vacuum. Great on carpet. Almost drives itself. Easy to use. Light”
- “Very pleased with the performance. Tools are easier to use. Cleans well”
- “Without doubt the best vacuum cleaner on the market. Every home should have one”

Actual customer comments

The SEBO Range also includes:

SEBO X SERIES

SEBO X1.1

SEBO FELIX SERIES

SEBO Felix Navy

Stair & Upholstery Turbo Brush*

Air driven rotating brush for small or awkward areas. Lifts carpet pile. Gives superior fibre/hair pick up.

Deluxe Parquet Brush*

For use on wood, tiled and other types of hard floor. The double jointed 'flex' neck design provides superb manoeuvrability. Natural bristles and soft wheels make it ideal for any type of hard floor.

Deluxe Kombi Head*

With a 'flex' neck for manoeuvrability it gives superb performance on hard floor and carpet. As with the Deluxe Parquet the brush is replaceable.

SEBO Fresh – Air fresheners

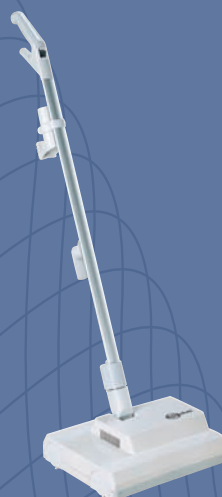

Perfumed capsules emit a pleasant aroma as you vacuum.

* Standard on some models. Please refer to product features guide on the back page.

The DUO dry carpet-cleaning system

For effective spot, carpet and upholstery cleaning – without water.

duo-P One idea – many advantages

A cleaning system with no unpleasant odours, no waiting time for drying, no shrinkage, just excellent results. Endorsements from the GAF allergy research centre in Germany and The British Woolsafe Organisation make duo-P the intelligent choice for those with dust allergies or wool carpets.

The DUO's contra-rotating brushes open up the carpet pile and allow the duo-P carpet cleaning powder deep into the carpet pile and around all of its fibres for optimum cleaning results.

duo-P is made from thousands of micro-sponges. As duo-P is brushed into the carpet pile or upholstery fibres, a cleaning solution in the sponges dissolves the dirt which is then removed when the duo-P is vacuumed out.
